第四部分 写作（共两节，满分 35 分）

第一节 短文改错（共 10 小题；每小题 1 分，满分 10 分）

Anyone who is on the way to success will be faced with difficulties. The key point is not to make complaints and to find a properly way out. My best friend, Tom, but proper is a excellent example. In Senior One, nobody knew that the difficulty he an had working out math problems. To tell you the true, more often than not, he feels truth felt math was too hard to learn well. With great determination, she went to his math he teacher, Jackson, to help. Jackson did what he could ^ help him out of trouble. for to We can see what how determined and diligent a boy Tom is. Now math has become a piece of cake for him.

第二节 书面表达 (满分 25 分)

Sample writing

Dear fellow students,

Due to the cold winter and the pressure in study, many students live a sitting-too-long life. Lack of exercise can cause illness and low efficiency.

To stay active and lead a healthy life, I strongly advocate some simple and practical approaches to exercise. Instead of intense workouts or sports, just focus on small bursts of activities in the daily routine. For example, during class breaks, get out of the seat, do some quick stretches, or walk around to speed up the blood flowing. Another good idea is taking advantage of PE lessons to run, and play basketball, football or badminton, to get refueled and refreshed.

My fellow students, you see, small exercise doesn't have to be complicated or time-consuming, but it makes a big difference to our good health and productivity. Stay active and stay healthy. Let's act now!
